INTERNSHIPS

Full Stack Developer Intern Jan 24 - June 24

Rishabh Software

- Technologies: Java, Spring Boot, Angular, MySQL, HTML5, CSS3, JavaScript, Git
- Completed extensive training in Full Stack Java development, covering both front-end and back-end technologies.
- Engaged in hands-on projects, gaining practical experience in Java programming, database management, and web development.

Android Developer Intern July 23 - Aug 24

Brainy Beam Technologies

- Technologies: Android Studio, Java, SQLite
- Developed a Food Donation application using Java and SQLite, aimed at facilitating food donation processes and reducing food wastage.

PROJECTS

Book My Meal

- Developed a meal booking system using Spring Boot and Angular, enabling employees to conveniently book their meals and receive coupons.
- Implemented advanced booking functionality, allowing users to schedule meals in advance, enhancing user experience and efficiency within the organization.

Blog Writing Space

- Developed a blog writing platform using ReactJS and Appwrite, providing seamless user authentication for login and logout.
- Enabled features like creating, editing, and deleting blogs with image support, offering options to make blogs public or private.
- Enhanced user experience with dynamic blog visibility controls and integrated image management for personalized content creation.
